DETAILED ACTION

Response to Amendment

Applicant's arguments filed 5/06/05 have been fully considered but they are not persuasive. Claim 1 is still believed to be indefinite and remains rejected under 35 U.S.C. 112, second paragraph, as explained below.

Regarding the rejection in view of Crozet et al, referring to the embodiment shown in figures 1-7, axis 16 defines the anterior-posterior axis as shown in figure 5, wherein the teeth are asymmetrical about a cross-section at said axis. With axis 16 defining the anterior-posterior axis, the corners perpendicular thereto are interpreted as side surfaces. As far as the scope can be determined, the saw teeth are shown angled approximately 45 degrees to these surfaces. If applicant is arguing that side faces 8 are the only "side surfaces", it is the Examiner interpretation, as far as the scope of the claims can be determined, that pins 26 are asymmetrical with respect to the side surfaces. Additionally, see the embodiment shown in figure 8 having pins 26.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 3738

Regarding claim 1, "asymmetrically with respect to the side surfaces" is not understood. The use of the term "asymmetrically" is believed improper; please provide a definition of said term and an explanation of the limitation. The Examiner fully understands the specification, page 6, lines 4 et seq., stating, "claw portions 490 and 490A are formed at a predetermined slanting angle with respect to the side surfaces 43A and 43B." Applicant is reminded that all claim language must be supported by the specification.

Allowable Subject Matter

Claims 3-4 and 6 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- (e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Application/Control Number: 10/642,684

Art Unit: 3738

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1, 2, and 5 are rejected under 35 U.S.C. 102(e) as being anticipated by Crozet et al.

Referring to all embodiments and figures, Crozet et al teaches an intetvertebral cage inserted between vertebrae of a spine comprising:

a main body defined by a pair of upper and lower surfaces 6, 8 and a pair of side surfaces connected thereto; and withdrawal prevention means (see the saw teeth which are formed approximately 45 degrees to the axis 16; and pins 26) formed on the upper and/or the lower surfaces of the main body and asymmetrically in a sectional side view, wherein the withdrawal prevention means regulates an insertion direction of the intervertebral cage.

The intervertebral cage according to claim 1, wherein the withdrawal prevention means are formed along with a plurality of parallel cutting lines slanting at a predetermined angle with respect to one of the side surfaces of the main body.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

Art Unit: 3738

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bruce E Snow whose telephone number is (571) 272-4759. The examiner can normally be reached on Mon-Thurs.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Corrine McDermott can be reached on (571) 272-4754. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
